

Project Manager

CEA is hiring...

CEA is a successful growing business, in demand in the UK and internationally, working for well-known clients providing environmental, consenting, and permitting support for energy and other infrastructure projects primarily offshore or at the land-sea interface. CEA is founded on talented individuals who deliver effective project solutions, drawing on a wealth of experience and knowledge. As a key team member, you would complement and extend this talent pool with your own expertise, energy, drive and creativity.

We can offer the right person a competitive package with flexible working arrangements and a mutually supportive working environment. We want great people to thrive with us and stay with us as we grow.

We have developed a business that delivers exceptional service to our clients, in a work environment that our team enjoy, thrive, and feel committed to. Benefits that our team members have mentioned which drew them to joining CEA and make them pleased to be part of the organisation include:

- Working with and for, credible, respected individuals with valued reputations in the industry (and the opportunity to learn from them).
- Working with a team of like-minded, individuals with similar work ethics and values.
- Being treated as a valued member of the company with the opportunity to play an active part in the development and growth of the business.
- Being supported and trusted to work flexibly to enable delivery of work whilst maintaining a home-life balance.
- Having the opportunity to work on interesting projects of various scales and types.

Benefits that our team members enjoy as part of working for CEA include:

- Workplace Pension
- Private Medical Healthcare
- Income Protection
- Death in Service
- Remote and flexible working
- Discretionary Bonus
- Enhanced Maternity/Paternity/Adoption Package

If you would like to work for a unique, creative, and supportive employer and play a part in the growth and success of our young, thriving business, we would like to hear from you.

Send your latest CV and short explanatory note to worktogether@ceaenvironmental.co.uk. No recruitment agencies.

The Role

We are looking for an experienced Project Manager to join our growing team who will lead delivery of site selection, environmental impact assessment and consenting for offshore wind and interconnector projects. The ideal candidate is someone who has worked on major energy infrastructure projects and is familiar with the UK regulatory regime for offshore wind and other marine infrastructure, with a particular focus on the DCO, Marine Licencing and/or Section 36 process.

You'll be degree qualified in a relevant discipline as well as having a project management qualification from the Association for Project Management or equivalent. You will also possess a good understanding of Environmental Impact Assessment (EIA).

Role and accountabilities

You will work as part of a growing team who have a range of experience across the nuclear, renewables and interconnector sectors.

Your role will be to progress CEA project management internally and deliver project management on our projects. This includes (but is not limited to) the following:

- Deliver project management services to interconnect and offshore wind projects – this will include managing CEA consultancy projects (e.g., EIAs and consents and environmental management services) and/or working with our clients to manage their projects. These projects are likely span from the early feasibility and site finding stages through to consents and environmental management pre and during construction.
- Work with each of the Directors to develop CEA's offering of project management services
- Undertake business development including meetings with key contacts, attendance at conferences or other relevant events.
- Management of technical subcontractors and associates.
- Oversee and manage CEA projects, ensuring delivery to contractual, time, cost and quality requirements.
- Work with the CEA team to improve our project management processes and mentor team members as appropriate to develop their project management skills.
- Work with the leadership team to progress leads and opportunities and support in preparation of commercial proposals.
- Support in technical delivery of consents and environmental services.

Knowledge and Skills

Essential

- Experience of project managing environmental and consenting work and teams for major energy infrastructure projects and interfacing with clients, other consultants and sub-contractors.
- Experience of the Planning Act 2008/DCO consenting process.
- Experience of managing large and complex programs and budgets and producing associated progress reporting.
- Proactive approach with proven track record in managing stakeholder expectations.
- Clear, concise communication skills (written and verbal).
- Good interpersonal skills, the ability to build effective relationships and influence.
- Excellent knowledge of Microsoft Office.
- Ability to work unsupervised independently working to tight schedules and managing multiple tasks.
- Ability to work to the company philosophies and culture.
- Results-focused.

- Excellent problem-solving skills with a strong ability to identify and resolve.
- Excellent written and verbal communication skills.
- Work well within a team environment and independently.

Desirable

- Experience in undertaking business development activities.
- Line management experience.

Qualifications

Essential

- Recognised project management qualification/accreditation.
- Relevant degree, individuals with equivalent professional qualifications and experience shall be considered.

Desirable

- Membership of a registered institute.

Skills & Requirements

Salary

£35k - 65k dependent on experience.

Location

Remote (with access to local workspace dependant on location)
